Shirhan To Be Tried
In Steel-Cased Room

LOS ANGELES (UPI)—Los Angeles County psychiatric authorities will charge Sirhan B. Sirhan, described by his prosecution argument that the victims’ deaths were the result of a "reflex attack." On November 21, 1966, Sirhan received a steel cased room on the third floor of the Ambassador Hotel in Los Angeles. The steel cased room was designed to protect against suicide attempts. However, Sirhan, who was found guilty of murder, was later found suffering from a mental illness and was committed to a mental institution. The steel cased room was opened to the public in 1968 and has since become a popular tourist attraction.
